

Pentagon Update – August 2018

As published in the August 2018 Washington Headquarters Services Transportation Management Program Office Newsletter

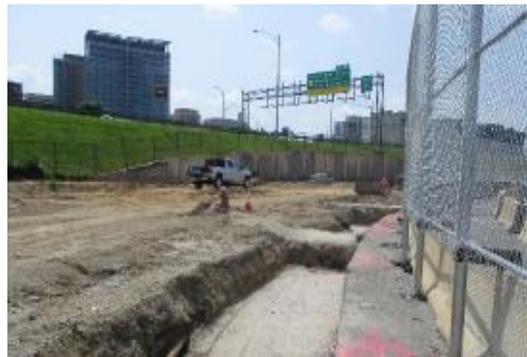

395 Express Lanes Construction Continues at Eads Street/Pork Chop

Construction work continues along Eads Street between the Pentagon Reservation and Army Navy Drive. The VDOT

construction crew is making good progress on the west side of Eads Street to widen pavement, install drainage, sidewalks, overhead structures, and curb and gutter in preparation for the 4th lane addition on South Rotary Road to access the future 395 Express/Toll Lanes. Two slug stations, 610 Mine Road and 610 Stafford are temporarily relocated to the kiss and drop areas by North Rotary Road as a traffic congestion mitigation for the duration of the Eads Street construction work. Pentagon personnel and regional commuters adapted to the detours and temporary change in traffic patterns.

There will be additional weekend construction work at the “Pork Chop” for the next few weeks. Beginning on August 24, 2018, the Pork Chop closes on Friday nights at 6 p.m. and remains closed until 4 am the following Monday morning to allow construction crew to perform drainage work. Slugging activities in the Pork Chop may continue until 8 pm on Fridays. Vehicles that are not removed by 6 p.m. on Fridays through September 17, 2018, will be towed at owner's expense. To locate a towed vehicle call the Pentagon Force Protection Agency (PFPA) at (703) 697-1001.

The next phase of the Eads Street construction will occur on the East side of Eads Street around the end of September to early October, subject to weather condition. The current travel lanes will switch to the West side. Please be prepared and pay close attention to signage as they will change to align with the new traffic patterns. More information will be available in mid-September.

Information on the detailed traffic pattern changes will be posted on 395ExpressLanes.com/pentagon. You can also follow us on
